ADAPTEC Group

Smart home adaptations for independent living

Specialist Solutions for Disabled & Vulnerable Individuals Across the UK

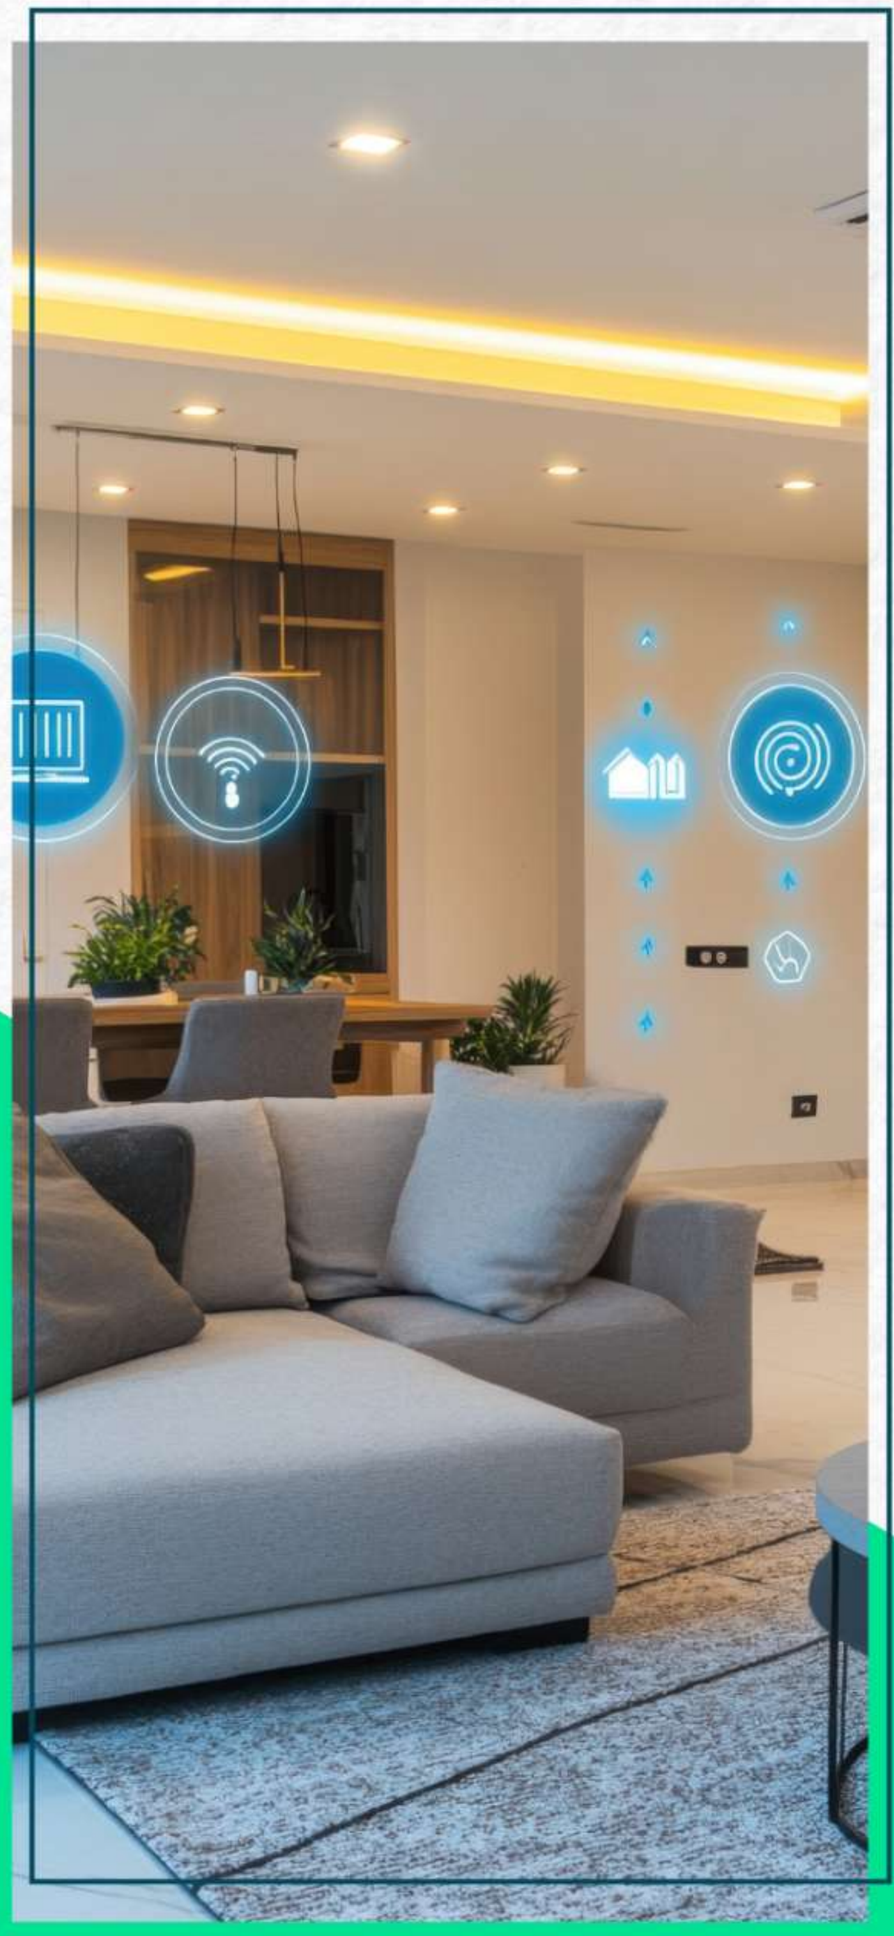

www.adaptecgroup.com

Delivering Independence. Reducing Care Dependency

Adaptec Mobility design and install tailored smart home systems that enable individuals with disabilities to live safely, independently, and with dignity in their own homes.

Our solutions are not gadgets — they are practical adaptations that directly support daily living and reduce reliance on carers and family members.

Who This Is For

Our systems are specifically designed for individuals with:

- Limited mobility or wheelchair use
- Reduced hand strength or dexterity
- Neurological or cognitive conditions
- Visual impairments
- Long-term or progressive health conditions

Each system is custom-built around the user's needs, not off-the-shelf.

Core Smart Home Solutions

1. Lighting & Electrical Control

- Voice, app, or switch-based control
- Automated schedules (day/night routines)
- Removes need to reach switches or move unnecessarily

2. Appliance & Power Management

- Smart plugs for kettles, TVs, heaters, etc.
- Safe remote shutdown to reduce fire risk
- Ideal for users with memory or mobility challenges

3. Voice-Controlled Living

- Full integration with Alexa / Google Assistant
- Hands-free control of the entire home
- Simple commands replace physical effort

4. Heating & Climate Control

- Maintain safe temperatures automatically
- Prevent overheating or cold exposure
- Remote monitoring for carers/family

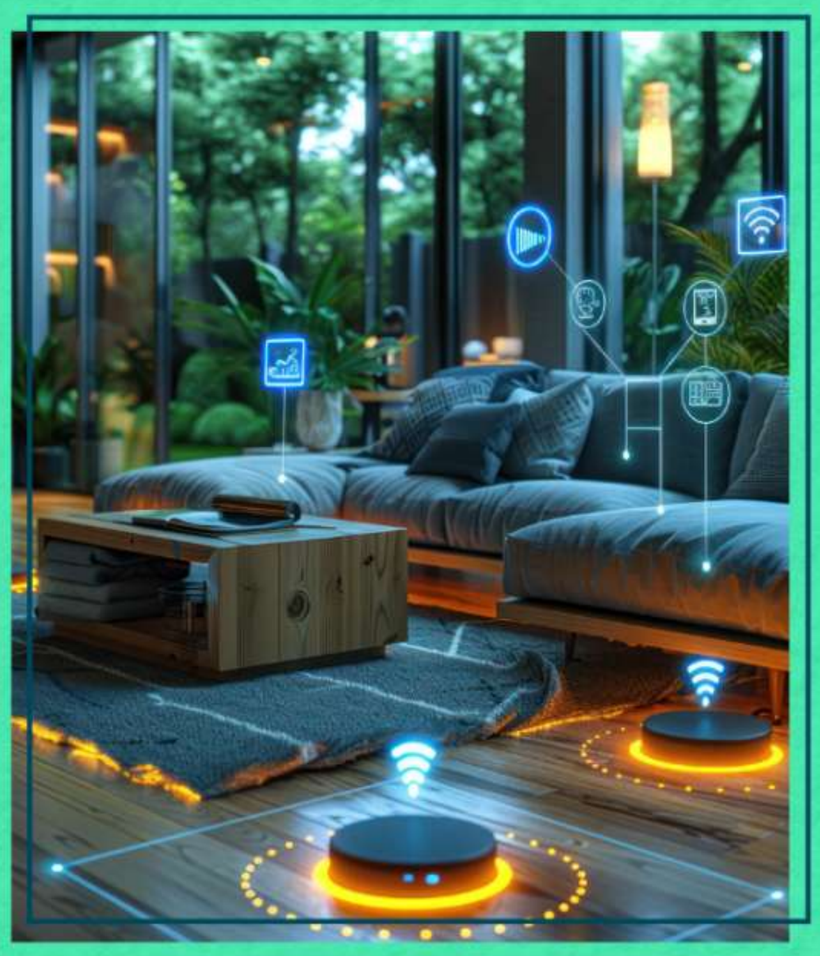

5. Doors, Windows & Access

- Automated opening systems
- Remote access control
- Improved security and ease of entry/exit

6. Safety & Monitoring Systems

- Motion sensors
- Environmental alerts (temperature, inactivity)
- Optional caregiver notifications

Measured Outcomes

Our installations are designed to deliver real, fundable outcomes:

- Reduced reliance on carers for basic tasks
- Lower risk of falls and accidents
- Improved daily routine management
- Increased user confidence and independence
- Safer living environment

Cost vs Care Reality

A typical care visit costs £20–£40 per visit.

Our systems can:

- Remove or reduce multiple daily visits
- Deliver long-term savings for local authorities
- Provide one-time investment vs ongoing care costs

This is why smart home adaptations are increasingly supported under DFG funding

End-to-End Service (Zero Friction for Referrers)

We handle everything:

- Site assessment
- System design tailored to user needs
- Professional installation
- Full setup & testing
- User training (simple, clear, no overwhelm)
- Aftercare & ongoing support

Aftercare & Support Packages

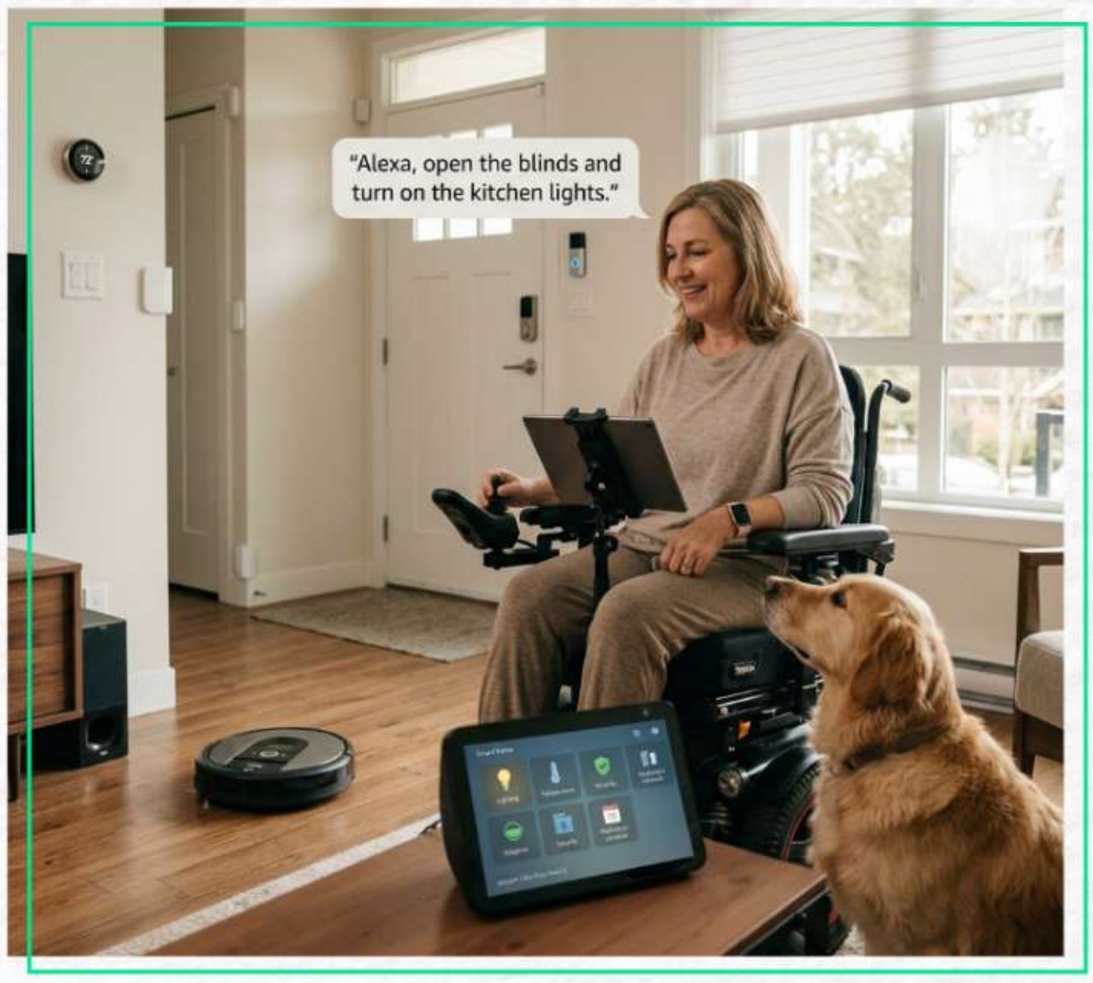

We provide long-term reliability — critical for vulnerable users:

- 1-Year Plan – Essential support
- 2-Year Plan – Extended coverage
- 5-Year Premium Plan – Priority response & full peace of mind

DFG & Professional Referral Ready

We actively work with:

- Occupational Therapists (OTs)
- Local Authorities & Housing Teams
- Case Managers
- Disabled Facilities Grant (DFG) applications

We can provide

- Supporting documentation
- Justification reports
- System specifications for approval
- Cost Proposals for options or bespoke projects

Why Choose Us

- Specialists in disabled adaptations (not just tech installers)
- Focus on real usability, not complexity
- Fully managed service — no burden on client or OT
- Proven systems that integrate into daily life seamlessly
- UK-based, reliable, and scalable
