AM2 – Assistive Living Operating System

Technology That Enables Independent Living

AM2 is an intelligent Assistive Living Operating System designed to help elderly and disabled individuals live safely, independently and confidently in their own homes.

Combining smart home technology, safety monitoring, automation and caregiver support, AM2 transforms a property into a connected, responsive living environment that adapts to the needs of the individual.

What AM2 Does

Smart Home Control

Control key home functions through a simple tablet, smartphone or voice command:

- Lighting
- Heating and temperature controls
- Appliances and smart plugs
- Automated doors and windows
- Environmental controls

Accessible by Design

Built specifically for people with disabilities and age-related challenges:

- Voice activated controls
- Large button interface
- One-touch navigation
- High contrast and accessibility settings
- Tablet-first design for ease of use

Safety & Peace of Mind

AM2 continually monitors activity and identifies potential concerns before they become emergencies.

Features include:

- Fall detection
- Inactivity alerts
- Emergency assistance button
- Appliance left-on notifications
- Automated emergency escalation

Family & Caregiver Connectivity

Family members and carers can stay informed and connected through a dedicated dashboard.

- Real-time wellbeing updates
- Alert notifications
- Remote support capabilities
- Activity monitoring
- Multi-user management

Intelligent Daily Living Support

AM2 helps automate everyday routines:

- Morning routines
- Bedtime routines
- Medication reminders
- Personalised home automation

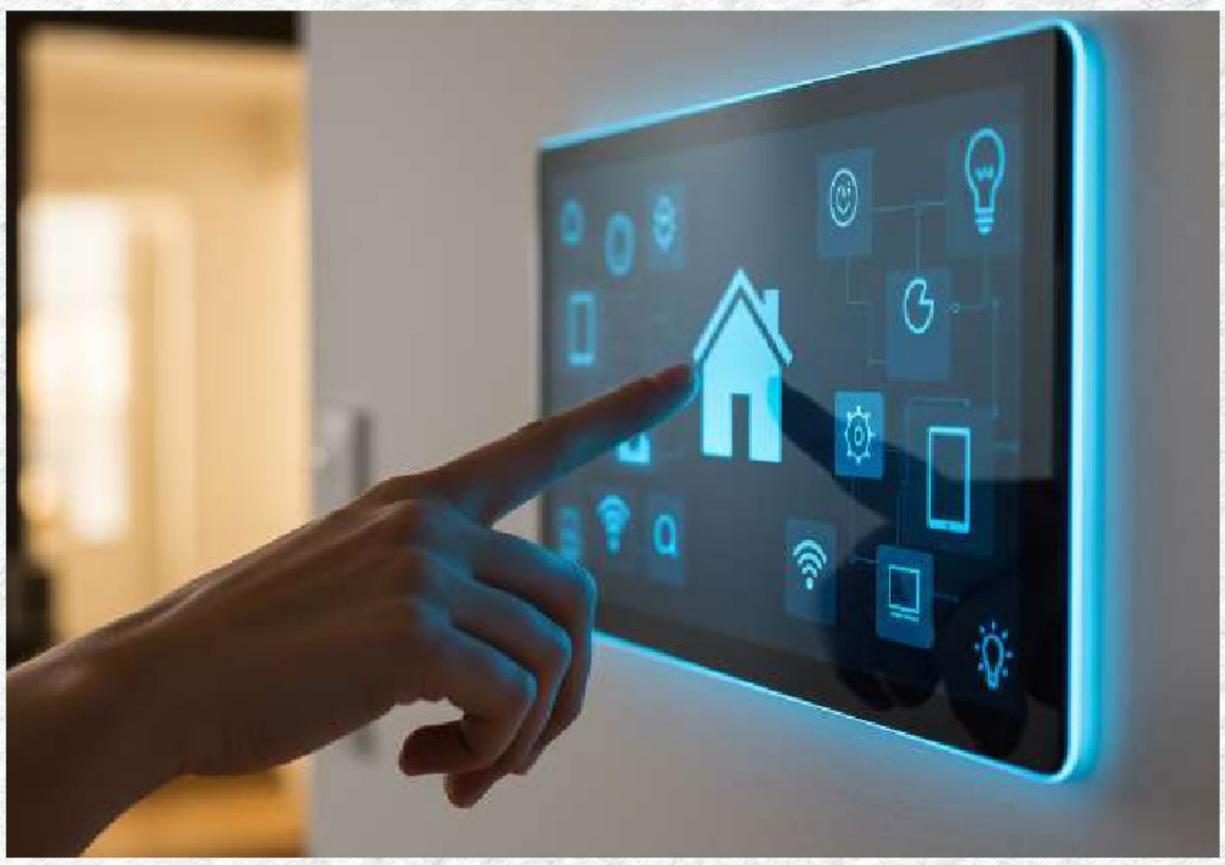
Behaviour & Wellbeing Insights

Using intelligent monitoring, AM2 can identify changes in behaviour and routine that may indicate a need for intervention.

- Movement trends
- Sleep patterns
- Routine consistency
- Long-term wellbeing reporting

Who Benefits?

- Older adults living independently
- People with disabilities
- Occupational Therapy clients
- Supported living providers
- Family carers
- Housing associations
- Local Authorities and DFG-funded adaptations



The Result

AM2 helps people remain independent for longer, improves safety within the home, reduces caregiver burden, and provides reassurance to families through proactive monitoring and intelligent support.
